**A COMPLEX, MULTI-JURISDICTIONAL, MULTI-SPECIES HABITAT CONSERVATION PLAN (HCP)**

which is designed to

**habitat**  
(habˈi-tat) n. The place or environment where a plant or animal naturally or normally lives and grows.

**MITIGATION LAND**

**ACQUIRED ACCORDING TO NBHCP GUIDELINES:**

(in the following proportions)  
Rice 50%  
Upland Reserve 25%  
Managed Marsh 25%

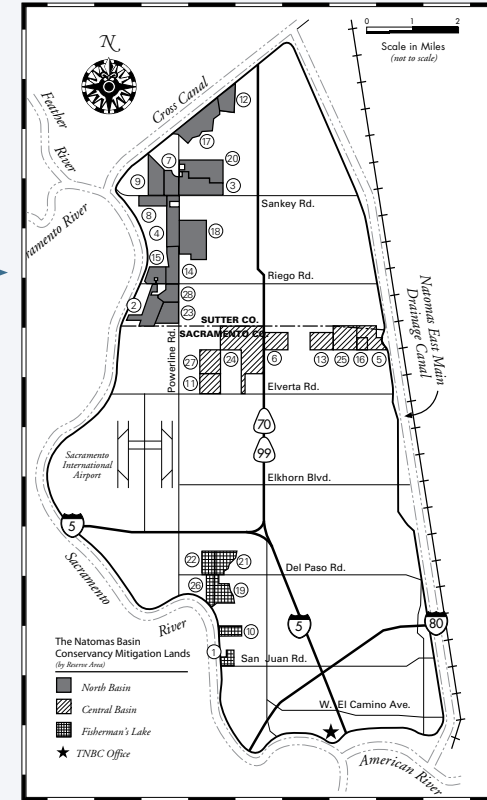

for

**species**  
(speˈʃeɪz, -sez) n. A class of individuals having common attributes and designated by a common name.

**PRIMARY**  
**SECONDARY**

Giant Garter Snake  
*Thamnophis gigas*  
Swainson's Hawk  
*Buteo swainsoni*

The purpose of the NBHCP is to promote biological conservation along with economic development and the continuation of agriculture within the Natomas Basin. The NBHCP establishes a multi-species conservation program to mitigate the expected loss of habitat values and incidental take of protected species that would result from urban development, operation of irrigation and drainage systems, and rice farming. The goal of the NBHCP is to preserve, restore, and enhance habitat values found in the Natomas Basin while allowing urban development to proceed according to local land use plans.

**Wetland Associated Species:**

Valley Elderberry Longhorn Beetle, Tricolored Blackbird, Aleutian Canada Goose, White Faced Ibis, Bank Swallow, Northwestern Pond Turtle, Delta Tule Pea, Sanford's Arrowhead
