

FINAL MEMORANDUM

To: John Roberts and Kim Burns, The Natomas Basin Conservancy
From: Allison Shaffer and Jamie Gomes
Subject: Natomas Basin Habitat Conservation Plan Fee Update—2015;
EPS #142118
Date: December 4, 2014

Introduction

Economic & Planning Systems, Inc. (EPS) has updated the Cash Flow Model (model) used to estimate the Natomas Basin Habitat Conservation Plan (NBHCP) mitigation fee (fee). This memorandum details the updated cost and revenue assumptions used to derive the 2015 proposed fee.

The fee contains components for the following five funds:

- Land Acquisition
- Restoration and Enhancement (R&E)
- Administration/Operations and Maintenance (Admin/O&M)
- O&M Endowment
- Supplemental Endowment

Figure 1 illustrates the purpose of and interaction among the five fee components. **Table 1** summarizes the fee history for each of the five components since the fee was implemented in 1996. **Table 2** summarizes the fee-funded cost per acre of habitat and the proposed fee by fee component. The proposed fee level is based on the assumed current NBHCP mitigation requirement of one-half acre of mitigation land for each gross acre of developed land. **Table 3** estimates the percentage change in each fee component and subcomponent for the 2015 proposed fee as compared to the current fee.

A cash flow analysis was developed for each fund to estimate the annual revenues, expenditures, and balances and to inform the fee estimates.

Table 4 summarizes these cash flow analyses, which are further detailed in **Appendix A**.

The assumptions used in the cash flow analysis are presented in **Tables 5** through **17**. **Table 18** shows The Natomas Basin Conservancy (TNBC)'s proposed 2015 budget (2015 Budget). For comparison purposes, this budget table also shows the estimated 2014 revenues and expenditures, as well as the source of the 2014 estimates.

Both the 2014 and 2015 budget amounts in **Table 18** are reflected in the cash flow tables. The budget amounts are based on a variety of factors, including model assumptions, actual experience by TNBC with particular activities, expected development, and TNBC’s knowledge of other expected activities (e.g., site specific management plan revisions) in the coming year. The 2015 Budget contains a discussion of the source of each revenue and cost estimate.

Proposed 2015 Fee

The table below shows the fee history and the proposed 2015 fee.

Year	Total Mitigation Fee	Less Land Cost Portion	Total Mitigation Fee Excluding Land Cost Portion [1]	Pct. Change in Total Mitigation Fee	Pct. Change in Mitigation Fee Excluding Land Cost Portion
<i>per acre</i>					
1996/97	\$2,240		\$2,240		
1998	\$2,656		\$2,656	18.6%	
1999	\$3,292		\$3,292	23.9%	
2000	\$3,941		\$3,941	19.7%	
2001	\$10,021		\$10,021	154.3%	
2002	\$11,962		\$11,962	19.4%	
2003	\$12,270	(\$4,500)	\$7,770	2.6%	
2004	\$16,124	(\$7,500)	\$8,624	31.4%	11.0%
2005	\$24,897	(\$12,500)	\$12,397	54.4%	43.7%
2006	\$41,182	(\$22,500)	\$18,682	65.4%	50.7%
2007	\$38,445	(\$20,000)	\$18,445	(6.6%)	(1.3%)
2008	\$38,133	(\$17,500)	\$20,633	(0.8%)	11.9%
2009	\$38,133	(\$17,500)	\$20,633	0.0%	0.0%
2010	\$44,050	(\$17,500)	\$26,550	15.5%	28.7%
2011	\$37,547	(\$15,000)	\$22,547	(14.8%)	(15.1%)
2012	\$32,861	(\$11,250)	\$21,611	(12.5%)	(4.2%)
2013	\$27,419	(\$8,750)	\$18,669	(16.6%)	(13.6%)
2014	\$32,259	(\$11,250)	\$21,009	17.7%	12.5%
2015 (proposed)	\$30,987	(\$11,250)	\$19,737	(3.9%)	(6.1%)

[1] Land dedication requirement instituted in 2003, requiring most developers to dedicate land in lieu of paying the land cost portion of the fee. The total fee excluding the land cost portion includes land transaction costs and contingencies. Current land cost is estimated at \$22,500 per acre.

The fee currently charged by the City of Sacramento (City) is \$32,259 per acre of development. The proposed fee is \$30,987 per acre. Nearly all mitigation land, however, is acquired by TNBC through land dedication because all but a few small-acreage developers are required to dedicate land in lieu of paying the land cost portion of the fee. The City Council re-authorized this land dedication requirement without a sunset provision at its February 13, 2007, meeting. The

proposed balance of the fee (non-land acquisition portion) to fee payers is \$19,737 per acre, approximately \$1,300 less than the current 2014 fee amount of \$21,009 per acre.

Table 3 estimates the change in the fee for each fee component and various subcomponents of the Admin/O&M component. The proposed 2015 fee represents a decrease from the 2014 fee level. Most of the decrease is attributable to increased revenue assumptions. EPS reconciled the actual account activity through 2013 with TNBC's financial statements, which resulted in greater revenue across all funds than projected in last year's model. In addition, TNBC increased some of the revenue assumptions in future years, such as the level of farm lease revenue.

There are also slightly lower overall costs in this year's model. Some cost estimates, such as special district water costs and property taxes are slightly higher for the proposed fee than for the current fee, while others, such as certain administration and operations and maintenance costs, are slightly lower. The cost and revenue updates and account reconciliations combined to result in the decrease in the fee. The updated cost and revenue assumptions are detailed in the following section.

Updated Model Assumptions

The updated fee amount was estimated using a revised cash flow analysis prepared by EPS for each of the five funds. Many of the changes reflect new estimated costs and revenues based on recent experience and input from TNBC. The updated assumptions are described below.

Cash Flow Adjustments

Table 4 summarizes the cash flow analyses for each of the five funds. Detailed cash flow analyses for each fund are provided in **Appendix A**.

In each cash flow analysis, EPS updated costs and revenues for 2012 through the end of the 50-year NBHCP timeframe in 2053. The updates for particular years and ranges of years are described below.

2012 and 2013

In each cash flow analysis, EPS reconciled 2012 and 2013 account activity to TNBC'S 2012 and 2013 end of year financial statements, respectively, to reflect actual revenues and expenditures. These reconciliations resulted in a combined fund ending balance in 2013 that was approximately \$3.8 million greater than projected in last year's model.

2014

As discussed previously, the source of each of the 2014 revenue and expense amounts is shown in the TNBC 2015 Budget Proposal table (**Table 18**). All fee revenue and investment income amounts were updated to reflect the activity through September 2014, the last month for which financial statements were available. Additional fee revenue was not projected because TNBC did not expect any additional developer fees through the end of the year. In addition, to be conservative, no further investment income was projected through the end of the year for the Land Acquisition, R&E, and Admin/O&M accounts. An additional 3 months of investment income was estimated for the O&M Endowment and Supplemental Endowment funds, however, to account for the higher level of investment earnings in these two accounts.

For all of the funds except for Admin/O&M, many of the 2014 cost amounts were updated to reflect the activity through September 2014, as reported on the September 2014 financial statements. The September account statements were used because they were the most current statements available and significant additional costs were not expected through the end of the year.

For most Admin/O&M fund cost items, however, where there are substantial ongoing Admin/O&M costs each month, the costs through September 2014 were adjusted to more closely estimate costs that would be incurred through the end of the year. Most of the cost items were increased to include estimated costs for the remaining three months of the year, based on the average monthly costs through September. For several items, however, the 2014 cost adjustments (e.g., property taxes, office lease costs, farm rent revenue, and the biological monitoring contract amount) were based on TNBC's knowledge of the remaining expected costs through the end of the year. Note that the 2014 estimated miscellaneous income is much lower than the 2015 budgeted amount because TNBC expects to participate in the Natomas Central Mutual Water Company (NCMWC) groundwater exchange program in 2015 and net approximately \$500,000 of revenue through this program.

2015

The 2015 revenue and expense amounts for all funds were obtained from the proposed 2015 Budget (see **Table 18**).

2016–2053

In each cash flow analysis, the revenue and cost estimates for 2016 through 2053 were updated to reflect the updated model assumptions presented in **Tables 5** through **17** and discussed in the remainder of this memorandum.

Cost Assumptions

Tables 5 through **17** detail the cost assumptions used to estimate costs for 2016 and later.

Land Acquisition Costs

Table 5 shows the land acquisition cost assumptions used to derive the Land Acquisition fee. The estimated land acquisition cost per acre remained unchanged from 2014 at \$22,500 per acre). This cost estimate reflects a stabilization of land values in the Natomas area and is based on TNBC's knowledge of confirmed recent land transactions, supported by a professional real estate appraisal. Land transaction and contingency cost estimates remained unchanged at \$1,500 per acre.

R&E Costs

Table 6 shows the R&E cost assumptions used to derive the R&E fee. At \$2,574 per habitat acre, there was no change in the overall R&E cost estimate. There were also no changes in any of the subcomponent cost estimates. The subcomponents are discussed below.

Base R&E Costs

The cost to convert rice acres into managed marsh was estimated at \$8,750 per acre. Because managed marsh will represent 25 percent of the total acquired acres, the conversion cost was multiplied by 25 percent to arrive at a cost of \$2,188 per acquired habitat acre.

The cost to convert rice acres into upland acres remained at the 2014 level of \$300 per acre. The conversion cost is applied only to the number of projected acres that need to be converted from rice to upland to reach the 25 percent upland requirement. In the current habitat, approximately 80 more acres of upland are needed to reach the 25 percent requirement. It is assumed that the conversion of these acres will occur over several years.

Biological Site Assessment and Preconstruction Survey Costs

The cost to conduct a formal biological site assessment and preconstruction survey for acquired mitigation land, as required by the 2003 NBHCP, was estimated \$150 per acre, based on information provided by TNBC.

Contingency Costs

The contingency component of the R&E costs is essential to ensure adequate funding for R&E, particularly given the lag time between when the fee is paid (and the habitat preserves are acquired) and when the R&E actually occurs. TNBC has three years to restore and enhance the designated preserves after approval of the Site-Specific Management Plan (SSMP), which comes one year after acquisition. Biological studies also need to be completed within that time frame.

A 10 percent contingency is assumed, which is the same as in the 2014 model. Although the contingency was not changed this year, it was reduced in recent past years (from a high of 25 percent) to reflect TNBC's increased level of experience with habitat restoration and enhancement. This added experience gives TNBC more confidence in its ability to estimate R&E costs, reducing the need for as large of a contingency.

Admin/O&M Cost Estimates

The Admin/O&M and O&M Endowment fee components together provide funding for the Admin/O&M costs through the end of the NBHCP in 2053. The net costs to be funded by these fee components decreased somewhat from a combined amount of approximately \$35,580 per habitat acre in the 2014 model to \$33,125 per habitat acre (a 6.9 percent decrease) in the 2015 model. This decrease is largely due to increased revenue caused by changes to assumptions for farm lease revenue and to greater investment income through 2014 than estimated in last year's model.

There are small increases in cost estimates for some items, such as property taxes and special district water costs, that are mostly offset by small decreases in cost estimates for other items, such as administration costs.

The Admin/O&M cost estimates are summarized in **Table 7** and discussed below.

O&M Costs

O&M costs are divided into the following three categories:

- O&M costs included in the land management contract for managing the marsh portion of the mitigation land.
- Annual O&M costs not included in the land management contract.
- Estimated TNBC costs for the replacement of fixed assets.

As summarized in **Table 7**, the O&M land management cost per acre is estimated as the 2015 land management contract amount divided by the current habitat size in acres. **Table 8** shows the ongoing O&M costs that are not part of the O&M land management contract. These costs were updated from the 2014 levels based on estimates from TNBC. **Table 9** includes an accounting of TNBC's fixed assets for which replacement costs are estimated. This table shows the original fixed asset costs, as well as the costs updated to 2015 levels using a 3 percent annual inflation rate to estimate the current replacement costs for the fixed assets.

Special Assessments

Special assessments consist of NCMWC and Reclamation District 1000 (RD-1000) costs. These special assessment costs constitute a significant portion of the Admin/O&M costs and are summarized in **Table 7**. The NCMWC cost estimate per habitat acre is detailed in **Table 10**. The assumptions concerning the NCMWC rates and the ability of the farmers to reimburse TNBC for the NCMWC assessments are summarized below:

- With the exception of the annual water toll per acre, the rates shown on **Table 10** are the NCMWC current published rates. The water toll rate for 2015 is estimated at a higher rate than currently to reflect a rate that NCMWC has indicated it may charge. It is assumed that 15 percent of the acres will be excluded from NCMWC assessments.¹

¹ TNBC's Finance Model now contemplates that 15 percent of TNBC land holdings will not be assessed the NCMWC tariff rate. The 15 percent factor is used in this calculation because not all land owned by TNBC lies in the NCMWC service area; therefore, the acreage outside the NCMWC service area would not incur NCMWC charges. This 15 percent factor for excluded land is used as an approximation in lieu of attempting to calculate and accurately predict many dynamic variables. Accounting for all variables could subject the Finance Model to risk levels believed by TNBC management to be unacceptable. These variables include the fact that decisions often are made late to fallow crop land or change from one crop to another, which would influence the amount of charges assessed by NCMWC. The Finance Model also does not reflect any late-year demand for water because of precipitation and other hydrological conditions, which largely are unpredictable. The Finance Model does not account for as-yet-made determinations regarding ground water well substitution (from TNBC wells) over NCMWC-supplied water, which is somewhat dependent on the ultimate NCMWC-approved tariffs and the breakdown between water usage charges and other components of the NCMWC fee structure. Moreover, a substantial portion of the total water costs assessed by NCMWC is assessed on shareholders of the NCMWC, regardless of whether they purchase irrigation water or not; this variable has not yet been published by the NCMWC Board of Directors but is expected to be different from those in recent years. It is assumed that the generalized approach noted above (85 percent of total landholdings are assessed NCMWC charges per acre per year) is adequate to estimate future water cost-recovery needs.

- It is assumed that TNBC will pay all NCMWC costs and subsequently be reimbursed by farmers for the lesser of either half of the water costs or \$65 per acre. This assumption rests on the following split:
 - The farm tenant pays for the approximate cost of water used in the production of the crop.
 - TNBC pays the approximate cost of administrative and related fees and charges.

TNBC is required, as stated in the 2003 NBHCP, to ensure that rice is produced on mitigation lands and believe this water cost arrangement works toward accomplishing this requirement and is fair to both parties.

- TNBC pays the full cost of water applied to managed-marsh complexes.
- TNBC has included a bad debt allowance of 5 percent of the NCMWC costs to cover the situation in which farmers fail to reimburse TNBC for their portion of the costs.

Table 11 details the RD-1000 estimated annual cost per acre for 2013, 2014, and 2015. The 2015 cost is estimated as the total RD-1000 levy on the 2014/2015 property tax bills divided by the habitat size in acres.

Property Taxes

The land acquisition cost per acre is estimated at \$22,500. Although this is the same estimates as in last year's model, it is anticipated that land values generally will increase over time. The method of estimating property taxes was changed in 2010, both to adequately capture the projected increasing cost and assessed value of new habitat land, as well as to reflect the recent suspension of state funding to support the Williamson Act. Some additional changes for estimating habitat property taxes were made in subsequent years. The current method of projecting property taxes is described below, and the property tax calculation is detailed in **Table 11** and **Table 12**:

- **Existing Habitat Properties.** Sutter County has instituted the option to decrease Williamson Act contracts from 10 years to 9 years, as permitted by state law through 2015. This option caused an increase in the property taxes on Sutter County properties with Williamson Act contracts. The annual increase was included in the 2014/2015 property tax bills. Although SB 1265 (the reduction in Williamson Act contracts) is set to expire in 2015, there has been no indication from the state of California that an alternative funding source has been identified to resume subvention of the Williamson Act. Therefore, it is assumed in the model that SB 1265 will be extended indefinitely and the Sutter County tax burden will continue at the higher rates.

In addition, property taxes could increase if Sacramento County also chooses the option to decrease the length of Williamson Act contracts. To reflect the uncertainty of maintaining the lowered property tax levels for Williamson Act properties, the annual property taxes for existing habitat are estimated as the actual property taxes levied for Fiscal Year 2014/2015 plus a 3 percent contingency.

- **Future Habitat Properties.** In light of the loss of state funding for Williamson Act contracts, TNBC staff believes that new properties will not be granted Williamson Act contracts. Consequently, the annual property taxes for future habitat still to be acquired are calculated as 1.3 percent of the estimated full assessed value of future habitat. This factor consists of the 1 percent property tax and an additional 0.3 percent to cover the additional taxes and assessments on the property tax bills. The only assessment not included in the 0.3 percent is the RD-1000 assessment, which is accounted for separately in the O&M costs discussed above.

From 2016 on, the model is based on the assumption that, on average, mitigation land acquisition costs will escalate by 3 percent annually, net of inflation, and that the assessed value per acre of new habitat acquisitions will track this 3 percent escalation. TNBC believes that the 3 percent net increase closely reflects the actual average increases in habitat land values in the region over the past decade. Annual taxes on new properties are estimated at 1.3 percent of the average assessed value per acre multiplied by the number of new habitat acres.

Mitigation Monitoring and Adaptive Management Costs

The mitigation monitoring and adaptive management costs in the 2015 biological effectiveness-monitoring contract² were the same as those in the 2014 contract (see **Table 13**). Other than the costs associated with the NBHCP-required midpoint program reviews, the pre-acquisition biological reconnaissance (included as a Land Acquisition cost), and the SSMPs, all mitigation monitoring costs are inflated by 3 percent annually after 2015 until habitat buildout to reflect both likely cost increases, as mitigation land acreage increases to 8,750 acres (the ultimate buildout level of the 2003 NBHCP), and anticipated increases in labor and related monitoring costs throughout the life of the NBHCP.

SSMP Costs

The cost of preparing and updating the SSMPs for acquired mitigation land remained at the 2014 levels. The SSMP preparation cost was estimated at \$225 per acre, and the SSMP update cost was estimated at \$15 per acre, based on information provided by TNBC staff (see **Table 7**).

Administrative Costs

Annual administrative costs were revised based on the current budget estimates of TNBC. They also include a 5 percent contingency, which is a decrease from last years' 10 percent contingency. This decrease reflects TNBC's increased level of experience with habitat administration. The overall administrative costs decreased very slightly from the 2014 model estimate of approximately \$1.1 million to an estimated \$1.0 million in 2015 (see **Table 14**).

Supplemental Endowment Cost Estimates

The Supplemental Endowment fund serves two purposes and is divided into two components, the Land Purchase Contingency component and the Changed Circumstance Contingency component.

² Currently, ICF International (formerly Jones & Stokes) is conducting all the biological effectiveness monitoring on behalf of TNBC.

The Land Purchase Contingency component provides for acquisition of the last 200 acres of habitat, and the Changed Circumstance Contingency component is to be used in the event of unforeseen circumstances, such as a natural disaster or the listing of a new species.

Supplemental endowment costs are driven primarily by the land acquisition cost assumption. There was no change in this assumption of \$22,500 per acre from last year's model. Since the estimated supplemental endowment fund investment earnings in 2014 were greater than projected in the 2014 model, however, the supplemental endowment costs to be funded by fees declined slightly from \$1,100 to \$1,058 per habitat acre (a 3.8 percent decrease—see **Table 15**).

Note that it is assumed in the model that the Land Acquisition fund is used to purchase all of the required habitat, including the last 200 acres. The Land Purchase Contingency component of the Supplemental Endowment fund provides a contingency for purchasing the last 200 acres of the 8,750 acre habitat in the event that the cost of habitat acres dramatically increases as the supply decreases. In this event, rather than imposing a large increase in the habitat fee for later development, the Supplemental Endowment fund would be used to supplement the acquisition of the last 200 acres. Currently, in the model, a spike in land prices is not assumed, and so the Supplemental Endowment funds are not shown as being used for land acquisition. Rather, the model shows the Land Purchase Contingency component funds being transferred to the O&M Endowment fund once all required habitat land has been acquired. Thus, it is assumed that the Supplemental Endowment Land Purchase Contingency Component funds will be used to help fund the ongoing administration, operations, and maintenance of the habitat if they are not needed for land acquisition. The potential transfer of the Land Purchase Component funds to the Endowment fund helps to keep the Admin/O&M and O&M Endowment fees lower.

The Changed Circumstance Contingency component funds are not assumed to be transferred to the O&M Endowment fund after the purchase of all habitat. This component is treated differently in the model because a natural disaster, listing of a new species, or other unforeseen circumstance that required additional funding could occur at any time, even after the acquisition of all habitat. The Changed Circumstances Contingency component is assumed to remain in place to provide this revenue if needed.

Revenue Assumptions

Rice and Other Crop Revenue Estimates

Rice Revenue

The Cash Flow Model continues to be based on the assumption that rent revenue will be earned on 90 percent of the total rice acres in the habitat. The average annual revenue rate is estimated at \$275 per rice acre, an increase of \$75 per acre over the rate in last year's model. This estimate accounts for a blend of highly productive rice fields, which produce higher cash rents, and low-yielding rice land, which can produce lower rent yields. This estimate also considers fallow fields and fields with no eligibility to participate in the federal farm program, which produces lower cash rents. The following steps detail the process for projecting the annual rice acres on which revenue will be earned in future years:

1. Begin with the previous year's estimated rice acres.
2. Add the rice acres assumed to be acquired during the year (see **Table A-3**). The rice acres acquired annually are assumed to be 75 percent of the total mitigation acres acquired. Further, the model is based on the assumption that the annual number of mitigation acres acquired will equal approximately the number of acres needed to maintain or achieve the annual habitat size required by the NBHCP (one-half of the number of acres for which fees have been paid, plus a 200-acre surplus).
3. Deduct the rice acres assumed to be converted to marsh and upland (see **Table A-3**). No acquired land that historically has produced rice was converted to marsh or upland in 2014. TNBC estimates that no rice acres will be converted to marsh or upland until 2016. Beginning in 2016, the model is based on the assumption that enough rice acres will be converted to marsh and upland so that the mitigation land use allocation required by the NBHCP (25 percent marsh, 50 percent rice, and 25 percent other land) will be achieved by the time fees have been paid for 9,000 acres of development and will be maintained thereafter.
4. Multiply the resulting number of acres by 90 percent to arrive at the estimated number of rice acres on which revenue will be earned.³

Other Crop Revenue

It is assumed that half of the habitat uplands will be committed to commercial farming of crops other than rice and the other half will not be farmed. The average annual revenue rate for crops other than rice is estimated at \$50 per acre, an increase of \$35 per acre over the rate in last year's model. The increase is based on TNBC's actual earnings from non-rice farm leases in recent years. The following steps detail the process for estimating the annual upland acres on which crop revenue will be earned in future years:

1. Begin with the previous year's estimated upland acres (referred to as "other" acres in the model).
2. Add the upland acres assumed to be acquired during the year (see **Table A-3**). The upland acres acquired annually are assumed to be 25 percent of the total habitat acres acquired. Further, the model is based on the assumption that the annual number of acres acquired will equal approximately the number of acres needed to maintain or achieve the annual mitigation land size required by the NBHCP (one-half of the number of acres for which fees have been paid, plus a 200-acre surplus).
3. Add the rice acres assumed to be converted to upland and deduct the upland acres assumed to be converted to marsh (see **Table A-3**). No acres were converted to or from upland in 2012, and TNBC estimates that no acres will be converted until at least 2017. From 2017 on, the model is based on the assumption that enough acres will be converted to and from upland so the mitigation land use allocation required by the NBHCP (25 percent marsh, 50

³ The 2003 NBHCP requires that 10 percent of all mitigation land holdings used to produce rice will be fallowed each year.

percent rice, and 25 percent other land) will be achieved by the time fees have been paid for 9,000 acres of development and will be maintained thereafter.

4. Multiply the resulting number of acres by 50 percent to arrive at the estimated number of upland acres on which revenue will be earned.

Hunting Revenues

Below are the two main assumptions used to project hunting revenues:

- Annual hunting income is estimated at \$10 per acre.
- The percentage of mitigation land used for hunting is estimated at 20 percent per year. This percentage is approximately equal to the current percentage of habitat on which hunting occurs.

Investment Earnings

Investment income is calculated for all funds. It is estimated differently for different years, as summarized below:

2014

For the Land Acquisition, R&E, and Admin/O&M funds, 2014 investment income is estimated as the interest earnings from the September 2014 financial statements. For the O&M Endowment and Supplemental Endowment funds, which have substantially higher earnings, an additional three months of income is estimated based on the average monthly rate for the first nine months of the year.

2015

Investment income for 2015 is projected by applying various percentages, depending on the particular fund, to the September 2014 fund balances. These percentages are listed below:

- Land Acquisition: 1.75%
- R&E: 1.75%
- Admin/O&M: 1.75%
- O&M Endowment: 3.00%
- Supplemental Endowment: 3.00%

2016–2053

Investment income projected for 2016 and beyond is estimated at 3 percent of the prior year's ending balance. While this rate may be more or less applicable in the short term, the interest rate is appropriate for use over a long period of time. This interest rate represents a "real rate of return." Because the cost and revenue projections in the NBHCP fee model are expressed in constant dollars and exclude inflation, the projected annual return on investments also should exclude inflation. The assumed real rate of return of 3 percent used to project investment income represents the annual rate of return that could be expected over and above inflation.

Habitat Acquisition and Conversion

The habitat acquisition schedule was updated to reflect habitat acquisitions actually made or projected over the last year and to update the projected annual habitat acquisitions in future years. In 2014, no habitat acres were acquired. The projected habitat conversion schedule for converting habitat acres to upland and marsh also was updated. TNBC estimates that no habitat conversion will take place until 2017. **Table A-3** details the habitat acquisition and conversion schedule.

fee hist

- [1] Land acquisition cost includes land cost, transaction costs, and contingency costs.
 Current land costs estimated at \$22,500 per acre. Transaction costs and contingencies estimated at \$1,500 per acre.
- [2] Fee component in 2001 and 2002 only.
- [3] Includes land transaction costs and contingencies.

Table 2
NBHCP 2015 Fee Update
Estimation of Habitat Mitigation Fee (2015 \$)

2015 Fee Update
17,500 acres of development
1/2 acre of mitigation land per gross acre of developed land
25% marsh, 50% rice, 25% other

Item	Fee-Funded Cost per Acre of Habitat	Mitigation Fee per Acre of Development	Percentage of Base Fee	Notes
Land Acquisition	<i>a</i>	<i>b=a x .5</i>		
Land Cost	\$22,500	\$11,250		
Transaction Costs and Contingency	\$1,500	\$750		
Subtotal Land Acquisition	\$24,000	\$12,000	40%	See Table 5.
Restoration & Enhancement	\$2,574	\$1,287	4%	See Table 6.
Administration/O&M [1]	\$20,703	\$10,352	34%	See Tables 7 - 14.
O&M Endowment [1]	\$12,422	\$6,211	20%	See Table A-7.
Supplemental Endowment Fund	\$1,058	\$529	2%	See Table 15.
Subtotal Mitigation Fee	\$60,757	\$30,379	100%	
Fee Collection Administration		\$608		2% of fee for collection
Total Mitigation Fee		\$30,987		
Total Mitigation Fee Excluding Land Cost Portion of Land Acquisition Component [2]		\$19,737		

fee sum 1

[1] Administration/O&M and O&M Endowment costs are set based on the cash flow analysis, ensuring that fund balances are positive in year 50 (2053) and that annual interest earnings in the endowment fund equal the drawdown by the Admin/O&M fund in 2053. See **Tables 7-14** for Admin/O&M cost assumptions.

[2] In some cases developers may dedicate land to satisfy the land acquisition component of the NBHCP. Any land dedication will be subject to the terms of the NBHCP.

**Table 5
NBHCP 2015 Fee Update
Land Acquisition Cost (2015 \$)**

2015 Fee Update
17,500 acres of development
1/2 acre of mitigation land per gross acre of developed land
25% marsh, 50% rice, 25% other

Item	Cost per Acre	Assumed in Financial Analysis	Notes
In-Basin Lands	\$22,500	100%	Price based on a review and analysis by a real estate appraiser of recent sales transactions and on consultations with landowners and real estate brokers.
Out-of-Basin Lands	NA		
Average Land Value	\$22,500		Assumes all acquisition occurs at the average in-basin land value.
Plus Transaction Costs and Contingency	\$1,500		Includes pre-acquisition field reconnaissance, surveys, Phase 1 environmental report, legal fees, and closing costs. Transaction costs assumed at 1/2 of total, contingency at 1/2 of total.
Average Land Acquisition Cost per Acquired Acre	\$24,000		Beginning in 2015.

re assumps

Source: The Natomas Basin Conservancy

- [1] A formal biological site assessment and pre-construction survey are required by the Final HCP -- April 2003.
[2] Initial marsh land estimated at 0% because TNBC estimates that little to no marsh land is available for acquisition. Rice land will be converted to marsh.
[3] Initial costs of all types of habitat land have been set to zero as no initial restoration or enhancement costs are anticipated.
[4] Based on estimates from Westervelt Ecological Services, as provided by TNBC staff.
[5] The cost of restoration and enhancement is weighted by the percentage of acres assumed to be converted or used for that particular land use.
[6] The percentage of rice converted to upland is based on the acres purchased through 2014 that are planned to be converted to upland.

Table 7
NBHCP 2015 Fee Update
Operations and Maintenance Assumptions (2015 \$)

2015 Fee Update
17,500 acres of development
1/2 acre of mitigation land per gross acre of developed land
25% marsh, 50% rice, 25% other

Item	Amount	Notes
Operations and Maintenance Costs		
Land Management	\$96.83 per acre	Land Management estimated costs of \$400,000 divided by the current habitat size of 4,131 acres (including supplemental mitigation)
TNBC Costs	\$92.33 per acre	See Table 8
Fixed Assets	\$22.35 per acre	Based on TNBC's inventory of fixed assets (see Table 9)
Subtotal	\$211.51 per acre	
Select Special Assessments		
NCMWC	\$93.92 per acre	See Table 10.
Reclamation District #1000	\$14.07 per acre	See Table 11.
Subtotal	\$107.99 per acre	
Property Taxes for Existing Habitat	\$51.82 per acre	See Table 11.
Preparation of Site Specific Management Plan	\$225 per acquired acre	Based on information from contracts regarding cost of SSMPs prepared to date. For cash flow modeling, applies to 2016 and beyond, not 2015.
Update of Site Specific Management Plan	\$15 per acquired acre	Based on expected costs. For cash flow modeling, applies to 2016 and beyond, not 2015.
Mitigation Monitoring and Adaptive Management		
One-Time/Fixed Costs	\$100,000 in 2019	See Table 13 for detail; ongoing monitoring costs increase by 3% per year until habitat buildout
On-Going Monitoring	\$315,316 per year	
Administrative Costs		
During Development	\$1,019,481 per year	See Table 14 for detail
After All Land Acquired	\$1,019,481 per year	
Operations and Maintenance Revenues		
Crop Land Leases		
Planted Rice Base Acreage	\$275 per acre	Estimate of average revenue per rice acre; revenue on 90% of rice acres
Other Crops	\$50 per acre	Estimate of average revenue per upland/other acre; revenue on 50% of other/upland acres
Hunting Revenue	\$10 per acre	Revenue on 20% of the acres

Source: TNBC FY 2015 proposed budget and 2014 model.

- [1] Figures shown here reflect estimates from the 2014 model, on which the current fee is based, not estimates of actual 2014 costs. They are included to provide a comparison of 2014 and 2015 model assumptions.
- [2] The 2015 amount is 40% of the total budgeted amount. The remaining 60% is assumed to be for the Endowment and Supplemental Endowment fund management fees (50% Endowment/10% Supplemental Endowment, as reflected in the cash flow tables).
- [3] Excludes: Land management contract amount, which is included in the O&M costs in **Table 7** and monitoring costs, which are included in **Table 13**.
- [4] Decreased contingency from 10 to 5 percent to reflect enhanced predictability of costs.

NBHCP 2015 Fee Update
TNBC 2015 Budget Proposal**

2014 Est. Amount	2015 Budget Amt	Line item	Notes on Budget Amount	Table in NBHCP Fee Update Model for 2016+	Source of 2014 Estimated Amount
I. Revenue					
-	\$151,893	Mitigation fees-Sacramento	Assumes 5 acres of development in the City for which NBHCP fees will be paid. The budgeted fee amount is calculated based on the proposed 2015 fee per acre.	Table 2: proposed fee per acre by fee component. Table 16: annual development projections.	September 2014 Statement of Activities
-	\$0	Mitigation fees-Sutter County	Assumes zero acres of development in Sutter County for which NBHCP fees will be paid. The budgeted fee amount is calculated based on the proposed 2015 fee per acre.	Table 2: proposed fee per acre by fee component. Table 16: annual development projections.	September 2014 Statement of Activities
-	\$0	Mitigation fees-Metro Air Park	Assumes 50 acres of development for Metro Air Park. The budgeted fee amount is calculated based on the proposed 2015 fee per acre.	Table 2: proposed fee per acre by fee component. Table 16: annual development projections.	September 2014 Statement of Activities
-	\$50,000	Mitigation Fees - Other	Additional one-time projects surface from time-to-time and this is a budgeted project placeholder. One such project could exceed this amount or no such funds could be received.	Table A-6: included in estimated annual fee revenue.	September 2014 Statement of Activities
\$13,563	\$40,000	Investment income-land acquisition fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2015, assumes 1.75% of prior year estimated fund ending balance.	Table A-4: estimated annual interest earnings	September 2014 Statement of Activities
\$12,848	\$110,000	Investment income-admin/o&m fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2015, assumes 1.75% of prior year estimated fund ending balance.	Table A-6: estimated annual interest earnings	September 2014 Statement of Activities

NBHCP 2015 Fee Update
TNBC 2015 Budget Proposal**

2014 Est. Amount	2015 Budget Amt	Line item	Notes on Budget Amount	Table in NBHCP Fee Update Model for 2016+	Source of 2014 Estimated Amount
\$17,848	\$30,000	Investment income- restoration and enhancement fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2015, assumes 1.75% of prior year estimated fund ending balance.	Table A-5: estimated annual interest earnings	September 2014 Statement of Activities
\$650,255	\$480,000	Investment income- endowment fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2015, assumes 3% of prior year estimated fund ending balance.	Table A-7: estimated annual interest earnings	September 2014 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$105,109	\$80,000	Investment income- supplemental endowment fund	Interest is accrued on investment account balances. Interest fluctuates periodically, and the total investment income will vary depending on the date available funds are used for various expenditures as well as interest rate changes. For 2015, assumes 3% of prior year estimated fund ending balance.	Table A-8: estimated annual interest earnings	September 2014 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$450,000	\$452,839	Farm rent	Projected cash rent for farms currently under contract. In future years, rice rent is based on the model assumptions of \$275 per acre on 90% of rice acres, and rent for other crops is based on \$50 per acre on 50% of upland acres.	Table 7: assumptions for years after 2015. Table A-6: estimated annual rice and upland acres.	TNBC estimate based on actual and projected revenue through 2014.
\$3,396	\$20,000	Miscellaneous income	Gross rent from residences, SAFCA contract payments, and various reimbursements.	Table 7: hunting revenue assumptions for years after 2015. Table A-6: estimated annual hunting acres.	September 2014 Statement of Activities
\$1,253,019	\$1,414,731	Total revenue

II. Expenditures					
Administration					
Administrative					
\$365,000	\$374,062	Staff	Estimate based on five staff members: Executive Director, Manager of Business and Accounting, Manager of Contracts and Compliance, Administrative Assistant and Field Services Assistant. (2.5% salary increase included.)	Table 14	TNBC estimate based on actual and projected costs through 2014.
\$137,096	\$145,515	Benefits and charges	Includes statutory wage payments, employment taxes (Social Security, Medicare, California Unemployment Insurance and Employment Training Tax) and benefits. Includes basic retirement plan and group health insurance plan (employer-sponsored high deductible health insurance plan with a health savings account net of employee contributions including dependant coverage of 50%; annual out-of-pocket maximum \$4,400 per individual/\$8,800 per family). The retirement plan, Simplified Employee Pension-Individual Retirement Account, involves no on-going liability to the Conservancy after employee separation and can be discontinued in any given year by action of the Board. Eligibility for participation in the plan at 13% of gross salary begins after completion of six months employment.	Table 14	TNBC estimate based on actual and projected costs through 2014.
\$6,133	\$10,000	Board expense	Includes \$100 per meeting fee; anticipates 10 Board members for entire year plus committee meetings. Includes small amount for miscellaneous Board expenses.	Table 14	September 2014 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.

Table 18
NBHCP 2015 Fee Update
TNBC 2015 Budget Proposal

2014 Est. Amount	2015 Budget Amt	Line item	Notes on Budget Amount	Table in NBHCP Fee Update Model for 2016+	Source of 2014 Estimated Amount
		Contract work, monitoring, and contingency			
\$36,079	\$42,500	Contract work, public education and publications	Similar to last year's budget, and includes general contract work, public education, and publications. Includes \$20,000 for the Ag Water Waiver program instituted by regional and state water regulatory agencies.	Table 14	September 2014 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$0	\$48,547	Contingency	5% contingency on above administrative expense items (excluding endowment and supplemental endowment fees).	Table 14	
\$379,548	\$400,000	Land Management	Estimate of land management labor costs based on 2014 total estimated costs.	Table 7	September 2014 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$298,196	\$298,196	Biological monitoring	2015 contract amount with ICF International plus connectivity and adaptive management. Pertains exclusively to biological monitoring as required by the 2003 NBHCP. Amount may change based on completion and implementation of the Biological Effectiveness Monitoring Program.	Table 13	2014 contract amount with ICF International plus connectivity and adaptive management.
\$50,000	\$150,000	SSMP Preparation and Revision	Estimated amount by TNBC for SSMP revision. In future years, subject to model assumptions.	Table 7: estimated cost per acre.	TNBC estimate
		Mitigation land			
-	-	Mitigation land	For 2015, there are no mitigation land purchase requirements. Most land acquisition is covered by the "dedication" requirement, so there will be no direct outlay of cash proposed. Even if the dedication is not required, because the Conservancy has 12 months to mitigate fee-paid land, there is a good deal of fungibility.	Table 5: estimated cost per acre. Table A-4: estimated annual acres acquired.	September 2014 Statement of Activities

47

**Table 18
NBHCP 2015 Fee Update
TNBC 2015 Budget Proposal**

2014 Est. Amount	2015 Budget Amt	Line item	Notes on Budget Amount	Table in NBHCP Fee Update Model for 2016+	Source of 2014 Estimated Amount
-	-	Loan repayment			
		Loan repayment	The Conservancy borrows from time-to-time on its line of credit with the City of Sacramento. No outstanding indebtedness exists at the end of 2013 so no loan repayments are forecast for 2014. When repayments are made, they are made at a rate of 75 percent of non-Endowment Fund fee income.		September 2014 Statement of Activities
		Operations			
\$207,949	\$214,085	Property taxes	This estimate is based on the 2014/15 tax bill for general property taxes and other levies and includes a 3% increase for the second half of 2015. This figure also includes the amount assessed for the Sutter County Williamson Act reductions but excludes RD 1000.	Table 11	Property taxes paid in 2014 plus one-half of taxes on 2014/15 property tax bill.
\$414,897	\$446,139	Water -- RD 1000 and NCMWC	For RD 1000, the actual 2014/2015 assessment was used to estimate the 2015 costs. No increase was assumed for the second half of 2014. The Natomas Mutual Water Company's assessment rate for 2015 is projected based on a rate \$10.50 per acre-foot plus estimates of water tolls. Includes farmer reimbursements. Most rice and upland farmers reimburse TNBC for 50% of costs, but only up to \$65 per acre.	Table 8: NCMWC estimated cost per acre. Table 12: RD-1000 estimated cost per acre. Table A-6: estimated annual acres including supplemental mitigation.	RD-1000: Amount paid in 2014 plus one-half of amount on 2014/15 property tax bill. NCMWC: TNBC estimate based on actual and projected costs through 2014.
\$622,000	\$378,000	Property maintenance	General property maintenance items, including fences, signs, road maintenance, weed control, security and general repairs. This also includes selected field leveling. No channel clearing projects are scheduled for 2015. Also includes electricity costs for lights and irrigation pumps on various Conservancy properties.	Table 9: estimated operations and maint. cost per acre. Table 10: estimated fixed asset reserve costs per acre. Table A-6: estimated annual acres including supplemental mitigation.	September 2014 Statement of Activities; multiplied by 12/9 to include est. for Oct. - Dec.
\$2,937,962	\$2,965,902	Subtotal

Sources: City of Sacramento and The Natomas Basin Conservancy.

[1] Projections of amount of habitat acquired annually are based on the projected amount of urban development for the year.

[2] The acres of rice converted to marsh through 2015 are amounts provided by the Natomas Basin Conservancy. In each remaining year, these acres are estimated as the number of acres needed to reach and maintain the specified percentage of marsh.

[3] The HCP does not limit the number of acres eligible for hunting. The percentages represent the estimated hunting acres.

[1] Other crop revenue assumed on 50% of upland/other acres.

[2] The 2013 amount represents Metro Airpark catch-up fees from 2006.

[3] Interest is earned at 3.0% annually on 100% of the prior year's ending balance.

[4] Represents Midpoint Program Review, assumed to occur in 2019.
