

## Background

The Natomas Basin Conservancy was incorporated on October 21, 1994 as a California Non-profit Public Benefit Corporation. It officially employed staff on March 15, 1999 and opened its first office at 1750 Creekside Oaks Drive, Suite 290, Sacramento, soon after. The Conservancy currently maintains offices at 2150 River Plaza Drive, Suite 460, Sacramento, California.

The purpose of the Conservancy is spelled out in the 2003 Natomas Basin Habitat Conservation Plan (NBHCP) as follows:

*The mission of The Natomas Basin Conservancy is to promote biological conservation along with economic development and the continuation of agriculture in the Natomas Basin. The Habitat Conservation Plan establishes a multi-species conservation program to mitigate the expected loss of habitat values and take of protected species that would result from urban development, operation irrigation and drainage systems, and rice farming. The goal of the Habitat Conservation Plan is to preserve, restore, and enhance habitat values in the Natomas Basin while allowing urban development to proceed according to local land use plans.*

In essence, the Conservancy is the “plan operator” of the Natomas Basin Habitat Conservation Plan (NBHCP) and the Metro Air Park Habitat Conservation Plan (MAPHCP). Parties to the NBHCP include the California Department of Fish and Wildlife, the City of Sacramento, County of Sutter and the U.S. Fish and Wildlife Service in addition to the Conservancy. The City of Sacramento and County of Sutter are not parties to the MAPHCP.

The organization is governed by a 10-member Board of Directors. All Board members are appointed to three-year terms of office by the City of Sacramento and the County of Sutter. The City and County each appoint five members to the Board of Directors. Board members elect from among themselves a Board President each year who serves a one-year term of office. The Board in turn hires the Conservancy’s Executive Director.

### ENDOWMENT (at year-end 2017)

Endowment: \$21,204,922  
 Supplemental Endowment: \$3,404,238

<sup>3</sup>HCP fees are paid on the basis of each acre of land within the HCP Permitted Area that is disturbed. For example; a 50-acre development pays fees based on the following formula: 50 acres times the current fee equals the total amount of HCP fees. With receipt of that fee, the Conservancy acquires and converts 25 acres of land for mitigation.

If the fee payer is dedicating land in lieu of paying the Land Acquisition Fund portion of the HCP fee, the "land dedication" fee (see above) is paid and title to 25 acres of approved land is deeded to the Conservancy.

See also the Conservancy's "Land Dedication Checklist" for further information on the land dedication fee payment process.

Important, on supplemental mitigation projects where mitigation ratios are not one-half to one (0.5 to 1, or 0.5:1), mitigation payments must be converted to equal the one-half to one established fee.
